*"You shall love the Lord your God with all your heart, with all your soul, and with all your strength. And these words which I command you today shall be in your heart. You shall teach them diligently to your children, and shall talk of them when you sit in your house, when you walk by the way, when you lie down, and when you rise up. You shall bind them as a sign on your hand, and they shall be as frontlets between your eyes. You shall write them on the doorposts of your house and on your gates." Deuteronomy 6:5-9*

## Curriculum Guide Forward

This mini e-Book was originally part of the Adventist Home Educator Handbook. We are offering this for free for a limited time, as we work at creating a new Handbook.

This Curriculum Guide offers reviews on many items that have been used by other SDA homeschoolers. Some of them we feel are better than others. We have put a ♥ by the items that are our favorites and ones that tend to follow “true education” more closely. Other resources are included as some resources are ones that may fit particular situations or desires of other SDA homeschoolers.

To view newer reviews of products, books, or curriculum, visit our website and look under Past Newsletters. Each newsletter usually contains at least one new review.

As you go into reading this Curriculum Guide, please say a prayer so that God can lead you to what is best for your family. May God bless you as you search diligently for products that will glorify Him in the lives of your children.

## **Play Dough**

Here is our favorite recipe for homemade play dough with natural coloring. It turns out even nicer than the commercial kind, plus it's a lot of fun to make with your children:

- 1 C water (or 1 C naturally colored liquid\* see below)
- 1/4 C salt
- 2 t cream of tartar
- 1 T vegetable oil
- 1 C white (bleached) flour

In medium saucepan, stir salt into the liquid. Add remaining ingredients and mix well. Cook over medium heat, stirring constantly, until the mixture sticks together and forms a large ball. Remove mixture from saucepan onto surface protected with waxed paper. Knead to a smooth consistency. Store cooled play dough in covered, airtight container.

\*Natural colorings:

- Red—juice from canned or fresh beets, add water to make 1 cup
- Yellow—1/2 teaspoon turmeric dissolved in 1 cup water
- Brown—1 teaspoon instant cereal beverage or coffee in 1 cup water
- Melon—1/4 teaspoon paprika in 1 cup water
- Purple—boil red cabbage in water, use 1 cup of the liquid
- Green—pureed spinach, amount varies with intensity desired
- Blue—crushed/pureed blueberries or juice from canned

## **Sidewalk Paint**

A half cup cornstarch, half a cup of water, six drops food coloring (or one tablespoon poster paint). Have fun being artistic on the driveway or sidewalk and it will wash away.

### Adventist Sabbath School Lesson Quarterlies

(Cradle Roll, Kindergarten, Primary, Junior, Earliteen, Youth, Collegiate) Sabbath School web page: <http://spsm.gc.Adventist.org/ss/>

♥ Cradle Roll, Kindergarten, and Primary quarterlies contain not only the Bible story for the child but suggested activities for the parent to do with the child. Custom-designed Bible curriculum for homeschools can very nicely be built around the Sabbath school lessons, especially those dealing with Bible stories. Supplement with *My Bible Friends*, *The Bible Story*, and other similar books. Mother should study the Spirit of Prophecy recommended reading because this enhances her teaching of the lessons. Audiocassettes such as *The Bible In Living Sound* are great supplements. You could also use the memory verses set to music, using available printed music and cassettes. (See Music).

Junior, Earliteen, and Youth quarterlies should be thoroughly screened by you for content before your child uses them. Recently, there have been issues discussed in the Junior quarterlies that many parents feel should be only discussed in family situations such as dating, sex education and values clarification. This has led many parents to choose *Young Disciple* as an alternative.

The *Collegiate* quarterlies (CQ) follow the adult lesson in content, yet are made relevant to a younger audience (youth, ages 16 to 29). A student following this lesson should be able to join an adult class and still understand the discussion. The reverse is also true; a parent can study the adult lesson and be able to discuss the lesson with their child.

### ♥ **AY (Pathfinders and Adventurers)**

(ABC, Advent Source, or local church)

Required Bible Year reading can be part of the Bible or reading curriculum or family worship times. (Check *Adventurer Manual*, *AY Instructor's Guide*, and *AY Honors* book for specific requirements.)

### **Arrabito Videos**

LLT Productions, P. O. Box 205, Angwin, CA 94508. 707/965-2786;  
[www.lltproductions.org](http://www.lltproductions.org)

- ✚ *Captain's Treasure Chest*. The story of creation with the late James Arrabito and children. James paints pictures and captivates the children as he tells and illustrates the creation story.
- ✚ *Inroads of Spiritualism*. An overview and history of spiritualism and the New Age movement. Covers secret societies, rock music, flying saucers, and Satan's use of the media.
- ✚ *Legacy of Halloween*. Search through history with James Arrabito and a live college audience and learn the religious origins of modern Halloween celebrations.
- ✚ *Young Folks History of the Sabbath*. Tracing the Sabbath from Eden to Eden with James Arrabito and children. An educational tool to acquaint the young and old with the rich heritage of Adventism.

**“Be diligent to present yourself approved to God, a worker who does not need to be ashamed, rightly dividing the word of truth.”**

2 Timothy 2:15

### ♥ **The Holy Bible**

Your own Bible should be readily available as you teach Bible to your child(ren), from birth on up. When your child begins to read, make sure he/she has a nice large-print Bible. The little children's Bibles with novelty covers and pictures are "cute" and easy to carry to kindergarten Sabbath school, but generally not too practical for Bible reading and study because of their small print.

Here are the reading levels of the various Bible versions:

- ✚ NIV-7.8
- ✚ NIrV-2.9
- ✚ KJB-12.0
- ✚ NKJV-9.0
- ✚ NLT-6.3
- ✚ NASB-11.0
- ✚ NRSV-10.4
- ✚ Message-4.8
- ✚ CEV-5.4

*Read Education  
"Bible Teaching  
and Study," pages  
185-192  
regarding the  
study of  
scriptures.*

The important thing is to get your child into the Word of God on a daily basis. Having a Bible version your child can read and understand is an important step to a daily relationship with Jesus.

We believe in putting a great deal of emphasis on Scripture memorization, which can be taught as soon as children are able to speak. In fact, they are better at memorizing before they can read, because they don't depend on the written words for a crutch. We also believe that Scripture memorization is very effective when the verses are set to music (see Music for resources), because it makes the words "stick" in their minds, and they find themselves singing the verses when going about their everyday activities. When children sing their Sabbath School memory verses at home during the week, there's never any problem with their repeating them in Sabbath School!

### ♥ Bible in Living Sound

### ♥ The Bible Story

Arthur S. Maxwell (ABC)

Nowhere else can you find such a complete and accurate account of Bible events written for children of all ages. Each story is told with such brilliant simplicity that it is a pleasure for adults to read as well. Uncle Arthur goes beyond telling the story, and helps children learn lessons in obedience, honesty, and reverence that they can apply to their own lives. Almost as soon as we are done with the last one, we are starting over again at the beginning.

Also available: Audio CD library of all 400 chapters in the classic Bible Story, narrated by Uncle Dan and the late Aunt Sue of *Your Story Hour* radio program, with sound effects.

It takes about 20 minutes each day to read the entire Bible in a year. Teens can do this during devotions. You can do it together as a family. For small children you can divide this into two 10-minute sessions.

### ♥ Bible Story Videos

Search Productions, The Quiet Hour, 630 Brookside, Riverside, CA 92373-4699

If you do not object to religious drama, these Adventist-produced videos are available:

- ✚ *For Such a Time*, the story of Esther. At the end, brings up the topic of religious liberty.
- ✚ *Mary's Song*, from the acquaintance of Mary and Joseph to the childhood of Jesus, with a focus on the rabbis' harassment of Mary because she taught Jesus at home.

These videos are tastefully done and are reasonably true to the Scriptural accounts. The child Jesus is portrayed in the latter video, the scenes are very brief and the young actor has no spoken lines.

### **Bible Lessons Series**

(Published by Pacific Press for Adventist church schools in the 1920's-1940's, now available in reprint form from Country Garden School).

These are many Adventist homeschoolers' first choice for formal Bible curriculum. They represent pure and simple Bible study, with a substance and depth that is not found in some of the more modern revisions of Adventist church school Bible curriculum. Titles are:

- ✚ *The Bible and Other Stories* (grades 1 & 2), covering selected stories from the Bible and church history, with a section which teaches the teacher how to teach the children.
- ✚ *When the World was Young* (grade 3), from Creation to Joseph.
- ✚ *From Egypt to Canaan* (grade 4).
- ✚ *The Last of Old Testament Times* (grade 5), from settlement in Canaan through the end of Old Testament history.

- ✚ *The Gospel to All the World* (grade 7), early Christian church, through the Reformation, and denominational history to 1940.
- ✚ *God's Great Plan* (grade 8), an in-depth review of the Bible stories and plan of salvation, from Genesis to Revelation.

### **Bible Series**

(published by Pacific Press from 1940's-1970's)

These are the books some of us used when we were in church school. They were hardback books with accompanying workbooks. They are no longer in print, available only in Adventist colleges' teacher education curriculum libraries, or privately owned by people who kept them. If you or someone you know happens to have them—and is willing to sell or loan them—they make nice supplementary stories, or you could even build a Bible curriculum around them if you wanted to. Some have been reprinted by Country Garden School.

- ✚ *Through the Years With God* (grade 3 or 4)
- ✚ *Day by Day With Jesus* (grade 5 or 6)
- ✚ *Messengers of the Promise* (grade 5 or 6)
- ✚ *The Wonderful Way* (grade 7 or 8)
- ✚ *Witnesses for Jesus* (grade 7 or 8)
- ✚ *Life and Times of the Old Testament* (grade 9), Creation to inter-testament period.

- ✚ *Development of the Christian Church* (grade 10), life of Christ through the apostles
- ✚ *The Story of Our Church* (grade 10), Adventist denominational history to 1956
- ✚ *Principles of Life*, a Bible doctrines text (grade 11)
- ✚ *Facing Life* (grade 12), general Christian living from a 1950's perspective

# Computers

Is a computer necessary to homeschool? Does your homeschooled child really need to learn computers? Several factors come into consideration here. Your child's interests, your ability to provide a computer access to one, and the time your family has available learning appropriate computer skills, not just playing "games."

**"Whatsoever  
you do, do it  
well."  
Ecclesiastes 9:10**

or  
for

Don't worry that your child's peers in school are getting a good education in computer skills. Very few schools have enough computers, instructors or computer time. Actual computer time in many schools is limited due to the number of computers, size of the class using those computers, 40 minute class time, and the teacher's ability to teach the subject.

If you do have a computer, don't let it gobble up precious time that should be spent with God, your family, in service for others or learning through True Education. Don't over use it; let it be a tool to serve you. Mothers and fathers are much better than a computer for reading a story, playing a game, and teaching children about God.

Many schools require some computer training for all students and some states are adding it as a requirement. If computer science does become a required subject in your state, and you can't afford a computer at that time, there are ways to get computer instruction through friends or neighbors or community classes.

Educational software should be considered supplemental, rather than a main curriculum resource. Useful software includes the Bible, Spirit of Prophecy, phonics and math drills, a good encyclopedia and typing programs. Though there are several core-curriculum resources, they would still take second place to learning projects with the family. Though more and more computer software is being written for and used in classrooms. Be very careful about how much you let a child, especially a very young one sit in front of a computer screen. Physically, it's just as damaging as a television screen with electro magnetic radiation. Keep computer sessions brief! Computers are simply another resource in your True Education experience.

## Early Childhood

Before ordering any preschool or kindergarten program, please read and re-read the sections in *Child Guidance, Education*, and the *Testimonies*, regarding age of school entrance, and what comprises "education" in the early years.

A child must be mature and ready for learning and overwhelmingly studies show that this does not occur until: vision 8-10; hearing 8-12; cognition 8-12 sometimes 18; coordination 6-16; brain development 10-12; and socialization 12-18.

Young children need a simple curriculum to enrich their environment that includes: 1) loving parents who are willing to take the time to respond to their questions; 2) a parent who spends lots of time reading true Bible and nature stories to them; 3) observation of things in nature, plants, bugs, birds, animals, and gardening, etc. Use these object lessons to point them toward Jesus; 4) learning phonics (sounds), colors, money, counting, and telling time in fun and unusual ways in the context of everyday experiences; 5) real life experiences such as where things come from, how we get things, etc.; 6) useful work inside and outside the home; 7) time in the kitchen with mother learning about health, measurement, and helping out in the home.

Another good source of information regarding readiness for learning can be found in *Better Late Than Early*, by Raymond and Dorothy Moore which is no longer in print, however the Moore Academy recommends *School Can Wait II*, by Raymond and Dorothy Moore, in its place.

"For the first eight or ten years of a child's life the field or garden is the best schoolroom, the mother the best teacher, nature the best lesson book... He should be surrounded with the conditions most favorable to both physical and mental growth."  
*Education, page 208*

Ultimately, you have to make your own decisions for your child(ren)'s education. If you decide to use more than the "field or garden" for your young child, here is what's available that we feel can benefit the homeschooling family.

Additional learning experiences include growing avocado seeds, carrot tops, potato eyes and sprouts on the kitchen windowsill.

The *Teacher's Guide* gives memory verses, questions and answers, suggested activities for each unit, and printed music scores of the songs. Appropriate for ages 3-7, and could even be used as readers for first or second graders. The cassettes contain the stories and songs, many of which are lovely for Cradle Roll and Kindergarten Sabbath schools.

*A Reason for Writing* is complete handwriting instruction for grades K-6. Emphasis is placed on practice in manuscript, transition, and cursive. Uses Scripture verses exclusively. For vocabulary purpose, The Living Bible is used. The student writes finished verses on a beautifully drawn “Border Sheet” which can be colored and used to share with grandparents and/or nursing home residents which includes service outreach, handwriting, scripture, and art in one class.

*A Reason for Spelling* starts with a values-based story. The daily lessons build on the story's theme. Integrates spelling with reading, writing and language arts.

Originally written by Adventist schoolteacher Carol Ann Retzer for use in the classroom. Now a committee of Christian, Catholic and Protestant teachers have re-written these resources for use in schools. Homeschool packs for both series and all levels include one student workbook, one teacher guidebook. Additional student workbooks are available separately.

## **HEXO Academics**

National Spelling Bee materials, [www.hexco.com](http://www.hexco.com)

## **Hooked on Phonics**

(Advertised on radio, TV, E-Bay, etc.)

There are several reasons to avoid this much-advertised product. First of all, it doesn't work. Parents spend \$250.00 for this course and end up with an inferior product which must be supplemented and phonics rules re-learned. It depends on the child memorizing, the letters numerical value meaning two things to learn. (Digraphs like "ou" and "ee" aren't even covered.) Second, it contains words and phrases such as Rome, Catholic, Holy Easter, etc. Third, the characters are inappropriate and disrespectful to each other. Fourth, the music is repetitive, hypnotic, rock type music. Fifth, there is a whispery voice that repeats sounds, almost like subliminal messages. Sixth, the high cost doesn't fit most homeschool budgets.

## **Natural Speller**

Katharine Stout (Design-A-Study)

Covers grades 1-8, spelling pattern rules, dictionary skills, roots, activity ideas. About \$22.

“Before attempting to study the higher branches of literary knowledge, be sure that you thoroughly understand the simple rules of English grammar and have learned to read and write and spell correctly. Climb the lower rounds of the ladder before reaching for the higher rounds.”

### **Phonics Tutor**

CD-ROM - [www.phonicstutor.com](http://www.phonicstutor.com)

This is the Alpha-Phonics course by Samuel Blumenfeld as a computer software program, \$85. No flashy pictures, blaring music, or jumpy cartoons, just 129 lessons covering, the 80 English phonograms, spelling, punctuation, and capitalization. Actually teaches the concept, your child hears each sound, hears each word, types each word and learns capitalization and punctuation at the same time. No annoying beeps for mistakes, the computer simply doesn't respond until the correct response is entered. Rated for ages 4 and up. Good for early readers just don't do too much at a time; Good for late bloomers as there are no little kids cartoons, and older students who need more phonics and reading experience; and adults who need remedial phonics education. I highly recommend this program for the older child. There are better programs such as *Reading Lesson* for the young child. Download a 4-lesson demo on website.

Also available is a *Phonics Tutor Teachers Manual* \$45 very handy for those of us who were not taught phonics. It shows each screen of the CD-ROM so there's never any question you can't answer. Teachers manual is highly recommend. Both items together \$119. Review, expand and extend learning with

*Student Reader*, \$29.95 and *Student Workbook*, \$24.95.

George & Rhonda Malkmus, Hallelujah Acres, P. O. Box 2388, Shelby, NC 28151; 704/481-1700; [www.hacres.com](http://www.hacres.com)

Three excellent books that explain how abusing God's health laws can cause sickness and death. The books show how illnesses can be cured by following God's plan for eating and health. If you have family members who don't appreciate the special health message from the Spirit of Prophecy, they will listen to this message straight from the Bible. A free newsletter, *Back to the Garden* is a good resource and witnessing tool.

*“The time spent in physical exercise is not lost...A proportionate exercise of all the organs and faculties of the body is essential to the best work of each. When the brain is constantly taxed while the other organs of the living machinery are inactive, there is a loss of strength, physical and mental. The physical system is robbed of its healthful tone, the mind loses its freshness and vigor, and a morbid excitability is the result.*

*Care needs to be exercised in regard to the regulation of hours for sleeping and laboring. We must take periods of rest, periods of recreation, periods for contemplation...The principles of temperance have a wider ranager than many think.”*

## Internet and Software

The Internet - World Wide Web - Online connects businesses, universities, libraries, homes, hospitals, etc. (essentially anyone who wants to join). It is accessed with a computer, communications software (Microsoft Explorer or Netscape) and a modem via your phone line or DSL to their website.

### Children and the Internet

As you already know, there are also many inappropriate Internet sites. Several times I've been dumped on one because they buy out of date URL's (addresses). You must be with your children and know what they are doing on the Internet at all times! This can't be emphasized enough. There are no guidelines or controls on the overload of information that is out there in cyberspace. Putting blocks on accessing sex, language, or violence sites does not always work. The reason is that many sites I've looked in for health or business related topics are not rated and won't let you there without a password. This makes it difficult to get anywhere. There is additional software that will help with this. The best solution is to be with your child and make it a family learning experience.

The justice department reports that 1 in 4 children are exposed to pornography while exploring the Internet. Filters alone do not work, simply misspelling a word can take you to a site where you can't get out. The greatest danger to children is found in chat rooms where predators are lurking. 1 in 5 children have been solicited by predators in chat rooms. Monitor your child's time on the Internet, install controls and filters, keep computers in a family area (not the child's bedroom), warn children of the dangers, know the lingo (i.e. ASL = age, sex, location) and teach them to never provide personal information.

### Homeschool and the Internet

Each of the main on-line services offer education sites, kids only libraries and college courses available. You can download books, search the Smithsonian, access National Geographic, visit the bottom of the ocean or the moon and many other things. Going on-line is not a necessity to successful homeschooling nor is it always the "wonderful" experience some have made it out to be. I've heard of good experiences and horror stories about children and the Internet. Life will certainly go on and most likely be less complicated for you if you are not involved on the Internet if

and Software 2

that is your choice. I just want you to understand that you can homeschool without the Internet. Here are some specifically homeschool Internet sites we know of, but have no experience with!

**On-line Universities**

These are an innovative use of the Internet. I've heard that there are 200,000 older students spending their spare time getting degrees on the Internet. They read lectures, take tests, and email their professors receiving more one-on-one time with professors than if they were on a campus. It can be expensive, but you are paying for the convenience of staying home and doing it in your spare time. This is definitely an alternative for homeschoolers. ## Learning Software

### **A+ Learning System Software**

(The Sycamore Tree, \$69.95 each level/subject)

Reading 1-8, Vocabulary 1-8, Language 1-9, Grammar and Writing 1-9, Spelling 1-7, Mathematics 1-12, Science 1-8, Chemistry, Biology, Social Studies 1-8, Civics, History, Economics, Government.

Instructions are read to the child, so it would be good for audio learners and those struggling readers. This is computer learning and recommended for a few subject areas not as a total curriculum.

### **Learning 2000 Lifetime Library**

[www.learning2000.com](http://www.learning2000.com)

Educational software on CD-ROM with core learning skills for grades 4-12. Take a placement test, study the lesson and take the final test in reading, writing, mathematics and other subjects. Developed by McGraw Hill for the military and business corporations, who paid \$8,500 per set, seeking to improve the knowledge of their employees. Includes an online dictionary (click any word and get a definition); automated record keeping; Math 1,2,3, Algebra 1, 2, core skills, reading 1, 2; spelling; grammar; sharpens skills while teaching literature, science (no evolution) and history from 111 books; 23 GB instruction; 2,200 minutes of video on 47 CD-ROM's available complete for \$599.

### **Mavis Beacon Teaches Typing**

(Software suppliers)

This is one of the most popular and award-winning typing programs available. It is suitable for all ages (5 to adult), colorful, and fairly interesting. Your current typing skill (or lack thereof) is evaluated at the beginning of the program, and learning modules are custom-tailored by the program to fit each student's individual needs. It is useful for total beginners to experienced typists who need to "brush up." The overwhelming complaint I hear is that you are given a guilt trip if you don't score high enough, or choose to discontinue a lesson.

### **Microsoft Encarta**

A CD-ROM encyclopedia you'll probably get it with a new PC. 41,000 articles, 3,523 media pictures with captions, enlarge capabilities, sounds, and videos such as a baby bird hatching, a bee's dance, an eagle fishing,

## and Software 6

and so many more. Other features include timelines, thesaurus, atlas, songs from other countries and the ability to print out pictures and articles. Some new age views and of course theories of evolution. Search with your children.

### **Pro-One Software**

Available at many software dealers, or from Solid Rock Software (see suppliers).

"School type" software for Biology, Pre-algebra, Algebra, Grammar, Spanish etc.

### **Robinson Self-Teaching Homeschool Curriculum**

P. O. Box 1279, Cave Junction, OR 97523.

Advertised as "A complete course of study for grades 1-12." This set of CD-ROM's includes: course of study, reading comprehension and vocabulary examinations, 120,000 page library in computer image format, 1911 Encyclopedia Britannia, 1913 Noah Webster's Dictionary, 6000 word Vocabulary Teacher, physical science, program and broad essential knowledge of history, literature, economics and general studies, progress exams. \$195 for the 20 CD-ROM set plus coupons for discounts on Saxon math books, "the only other materials you need to provide."

You are led to believe that the entire curriculum is on the computer, in reality your children do not use the computer much at all, you print out thousands and thousands of pages of books, which your child is suppose to read for their curriculum. It is estimated that it would cost \$6000.00 in computer paper and printer ink to do this. Many of these books are fiction, and as for the other books, I'd prefer to have them as regular bound books in my home library, not as computer printouts.

My concern here is that this type of teaching (one education for all) doesn't encourage creativity, it doesn't include Learning Projects, there is no one-to-one time or interaction with parent/teacher, and it doesn't take the child's individual talents and interests into account.

### **Sunday Software**

800/678-1948, [www.sundaysoftware.com](http://www.sundaysoftware.com)

Bible-based software, study guides, lesson plans and outlines. Some of the many titles include *The Life of Christ*, *Good Sam the Samaritan* and *The Ten Commandments*.

### **Switched-on Schoolhouse**

Published by Alpha Omega, [www.switched-onschoolhouse.com](http://www.switched-onschoolhouse.com)

## and Software 7

SOS is school curriculum on CD-ROM for grades 3-12. Available as a complete grade package or individual subjects of: science, Bible, history, language arts and math. Other CD-ROM's include a Health Quest unit for grades 4-7, Spanish for ninth grade, State History, and College Planner for 12th graders. Approximately \$275 per grade level.

Basically students read the text, just like a textbook but with video clips, pop-ups and Internet links, then solve problems and take a test. Missed problems are repeated, skipped problems are flagged.

Here's what there is to like about it. The responsibility of choosing curriculum resources is gone, you've spent the money either use this or pay for another curriculum. Everything is computerized for you- lesson plans, record keeping, grading and even communication via email with your child.

Here's what's not to like about it. You are referred to as "teacher" and you have to be comfortable with the computer and figure out initial set up with calendars, assignments, and lesson plans along with all the settings and controls with the program. This program is really no more than a textbook with video and cartoon clips. It is still a one-size fits all education leaving no time for Learning Projects, group learning (which is what families do), and child-led interests. The curriculum contains cartoons and video clips throughout, requires reading of fiction and Internet links. It also uses communication between student and teacher (you and your child) via email, and I don't choose to communicate with my child via the computer and email regarding questions, assignments, lessons, grades and problems. If you don't like this, or think you can recoup your money, realize that you cannot resell this program to anyone as you agree not to when you purchase it. eBay will pull your listing if you try to sell this there.

For a complete curriculum I think it's too much computer time, electronic learning, and detached school type learning. To enhance one subject such as math or language arts, it's a possibility but still with all the drawbacks mentioned above.

### ♥ **Typing Instructor Deluxe**

(Timberdoodle, \$12.00)

Straightforward typing instruction with no dancing animals, wizards or rock music.

Additional titles are listed under subjects.

## Language, Grammar and Composition

**“Death and life are in the power of the tongue.”**

Proverbs 18:21

Teaching of language begins from the moment of birth. Your child grows gradually in understanding of spoken language as he matures. Your child can become an “author” long before he is able to read or write by telling stories to you and eventually dictating stories and letters for you to write down. If he has this background, it will be easy for him to write his own stories after he has mastered the mechanics of written language.

As with all subjects, use English curriculum materials as a tool to achieve your goals, and do not be a slave to a pre-designed curriculum.

### Adventist Materials and Resources

#### ♥ AY (Pathfinders and Adventurers)

Many AY awards, honors and class work require oral or written descriptions. These are excellent opportunities to learn and apply compositional skills. (Check *Adventurer Manual*, *AY Instructor’s Guide* and *AY Honors* book for specific requirements such as Journalism.) There is also a Sign Language honor that is a fun and practical to pursue and can develop into service for others.

#### The King’s English

Becky Kaylor Vermilyea, 73 HC 34, Mt. Grove, MO 65711.

This is an excellent English curriculum, a sequential order of learning, but topics and activities vary throughout the course so that the student does not get bored with a lot of one thing. Plus, there is constant review, so the student doesn’t forget concepts as easily. The series consists of Books A, B, C, D, E, and F (corresponding

*“One of the fundamental branches of learning is language study. In all our schools, special care should be taken to teach the students to use the English language correctly in speaking, reading, and writing. Too much cannot be said in regard to the importance of thoroughness in those lines.” One of the most essential qualifications of a teacher is the ability to speak and read distinctly and forcibly. He who knows how to use the English language fluently and correctly can exert a far greater influence than one who is unable to express his thoughts readily and clearly.”* *Counsels to Teachers*, page 216

to grades 3-8). Sentence and paragraph material used are Bible stories, nature stories, and Ellen White stories. If you run across anyone with used copies to sell, it would be worthwhile to obtain them! Or you can order unbound photocopies of the original master copies directly from the author, contact the author for costs.

## Learning Language Arts Through Literature

(Cornerstone Curriculum Project and

[www.common sensepress.com](http://www.common sensepress.com))

I am hesitant to list this resource because of the fiction literature that it is based on. It is considered "good" fiction, from a non-Adventist point of view, but fiction, nonetheless. You would have to examine the material and make the decision based on your personal convictions.

The writer claims this contains complete instruction for all aspects of language arts: grammar, spelling, copying, dictation, writing mechanics, penmanship, comprehension, as well as phonics and reading (decoding) on the earliest levels. Grade 1 – 12.

It is not necessary to follow someone else's set curriculum for English. Once your child can read and write and knows the basics of grammar, punctuation, capitalization, and word usage, the best learning experience is to just write—personal and business letters, journals, stories, essays, reports, research papers, large and small, daily journal, a video or book review, your own biography. Encourage your child in reading aloud and speaking—giving Scripture and prayer, mission stories, telling Bible stories to younger children, etc. Learn to take notes during a sermon or while watching a documentary.

### **Rod and Staff**

(traditional textbooks)

This is an English curriculum for the elementary grades 1-8. A good guide to English though the workbooks tend to be tedious.

- ✚ The Eight Parts of Speech
- ✚ The Sentence
- ✚ Punctuation and Capitalization
- ✚ English Handbook, reference volume to supplement any English curriculum.

## ♥Winston Program

(The Moore Academy, Hewitt)

This is the grammar program recommended by Dr. Moore and many Adventist homeschooling moms who have used it. It can be used by itself or to supplement other English curriculums. The system uses colorful cards for parts of speech and sentence structure, which makes grammar easy to learn. There is a student workbook and teacher's book for each level of *Winston Grammar*. Could start at grades 3 or 4, depending on your child.

*Winston Grammar* covers the eight basic parts of speech and how they are used in sentences.

*Advanced Winston Grammar* covers more difficult concepts, such as clauses, infinitives, gerunds, and compound and complex sentences.

*Usage* offers a unique selection of English usage challenges designed to eliminate over 60% of grammar errors occurring in everyday spoken and written language.

*Vocabulary* (grade 7 and above) comes in Leves I, II, and III, covering 1200 words which are the kind are most likely to appear on the *S.A.T.*'s. Each kit contains a workbook and audiotape for correct pronunciation.

*Punctuation* (ungraded) includes all of the information for punctuation success.

Janie B. Cheaney. Small Ventures, 11023 Watterson Dr., Dallas, TX 75226; 940/566-6123. (Also Timberdoodle) Creative writing for grades 6+, \$11.

- 📖 *Wordsmith Apprentice* – ages 9-12, \$16. Paragraph writing, reporting, sentences, parts of speech, opinion writing.

Teaching Tip:

Match things, mothers and babies, shoes and family socks while doing laundry. Begin teaching number recognition. Learn shapes. Learn money concepts, names of coins, count coins into dollars. Make a calendar; teach days, months and seasons. Learn measurements by sewing with mom, and using a tape measure. Learn fractions while cooking, cutting pie or pizza, dividing marbles. pattern blocks, balances, geoboards, charts, tangrams, color tiles, multilinks, counters, and dominoes in a handy tote box. \$59.95.

For many years this was the only advanced curriculum available and had been our first choice in math curriculums, and recommended overwhelmingly by homeschool moms everywhere as the best math program available to homeschoolers. Some are hesitant to try it at first, because the student does all work on paper (we prefer a spiral notebook) rather than in a workbook. But those who have used it can strongly testify that it is well worth the effort. Grades 4 and

up are not expensive, with the entire homeschool packet of student soft cover textbook, tests, solutions manual and worksheets around \$35-65, depending on grade level. The tests are reproducible, so the entire packet can be used with your next child or sold intact to someone else when you are finished with it. It ends up being very affordable.

Lessons include: 1) warm-up activities including facts practice and problem solving, 2) daily lesson, 3) lesson practice, 4) cumulative practice, 5) cumulative tests.

These books are based on the incremental approach and are usually self-instructional, especially for the mid-elementary student who has mastered the number facts (through a program such as *Math-It*). The lesson explanations for the student are clear, which gives *Saxon* a big edge over other programs. Users consistently report that standardized test scores in math have improved after using *Saxon Math*, and many Adventist homeschoolers can verify that claim.

- ✚ *Advanced Mathematics* (geometry, trigonometry, algebra III) Logarithms, trigonometric identities, infinite series, matrices & determinants.
- ✚ *Calculus* (with trigonometry and analytic geometry) In depth coverage of all topics required for the *Advanced Placement Calculus Exam*.
- ✚ *Physics* students will be prepared for *Advanced Placement Physics Examination* when they have completed this book.
- ✚ *Saxon Math Solutions Manuals*. Every problem is worked out in these solutions books, step-by step which is wonderful for those of use who do not remember or who flunked advanced math when we were in high school. Also take advantage of their 800# to get help if your child needs it.

I highly recommend using **DIVE Into Math** (found on the previous page) with Saxon math especially Algebra on up.

## **Singapore Math**

(Sonlight Curriculum in Colorado)

Students in Singapore came out first in international Math tests so of course this curriculum is a popular resource with homeschoolers. This has a cultural flavor, early editions teach Singaporean money and was designed for institutional schools. Definitely nothing magic or new here, because learning math takes a lot of work and that is exactly what the students in Singapore did to get good scores.

## **Surviving the Money Jungle**

*Music education can begin at birth (or before). Listen only to the best music in your home, on the car radio, etc., and your child will be less likely to be attracted to the wrong kind of music later.*

## **Piano (or other music) Lessons**

One homeschooling mother who is a professional piano teacher can positively verify the Moore's philosophy of "better late than early." From her own experience and observation, the students who started piano lessons at age 5½ were no farther advanced by age 12 than the ones who started at age 8½. The main difference was that their parents had paid for three additional years of piano lessons!

In *Better Late Than Early*, the Moores quote a study which found that the best progress in music lessons was made by students who started at age 11½. Although this mom taught music to her own children since birth (she likes to think even *in utero!*), and she sat down with her son for short daily "piano times" when he was 5½, she did not begin him with formal piano lessons (once-a-week lesson, practice-every-day—still with Mother, however) until age—you guessed it—11½.

In her piano-teaching years, her best beginning piano students were the 8- and 9-year-olds. Many of the older students had started piano too young, had become burned out, and had developed bad habits and bad attitudes. Those younger were just too young, lacking physical coordination and necessary self-discipline for serious music study.

If you want your very young child to learn piano, she recommends that you teach him or her yourself in 5- to 10-minute daily lesson-practice times. If you do not play the piano well enough to do that, it would be much better for *you* to take the piano lessons and then teach your child. For a school-age child, you could take the lessons together. In no case should you expect a child younger than 10 or 12 to be able to practice effectively without your direct supervision. As with all of homeschooling, you only need to keep "one step ahead" of your child in order to teach him/her the basics. Homeschooling parents, with sufficient preparation, can teach beginning piano just as well as they can teach reading or math or English.

### **Piano Theory**

Mary Elizabeth Clark and David Carr Glover (available from your local music store) This is the theory course to accompany the *David Carr Glover* piano courses. However, as a programmed text, it makes an excellent theory course for children. It can supplement any piano course or can be used by itself. The only disadvantage is its rather small print. 3 +.

### ♥ **Randy Potter School of Piano Technology**

# Reading and Literature

One thing I have learned, never give up, pray for wisdom and work with your child's interests. They do learn to read, it may not be on your time schedule, but for certain on theirs!

## Adventist Materials and Resources

### ♥ AY (Pathfinders and Adventurers)

All class work requirements include reading of several books and other materials. (Check

**“Give attendance to reading.”**  
1 Timothy 4:13

*Adventurer Manual, AY Instructor's Guide, and AY Honors book* for specific

requirements.) This reading can be assigned as part of the reading curriculum or extra credit (outside reading) assignments. This is also an excellent opportunity to teach writing of book reports and how to make correct bibliographical entries.

*“Children need proper reading which will afford amusement and recreation and not demoralize the mind or weary the body...If pure and good reading is furnished them, they will cultivate a taste for that.”*

*The Adventist Home, page 411*

### ♥ The Bible

For your information, the reading levels of various Bible versions are: NIV-7.8; NirV-2.9; KJV-12.0; NKJV-9.0; NLT-6.3; NASB-11.0; NRSV-10.4; The Message-4.8; CEV-5.4.

### Bible Stories for Early Readers

(The Moore Academy, ABC)

### Felt letters

(ABC, The Moore Academy, The Sycamore Tree, teacher supply stores)

*The Holy Bible is the greatest piece of literature written. Use it for handwriting practice, spelling words, poetry, prose, allegory, history, parables and Bible study. Make it the first priority in your learning experience.*

### ♥ **Gospel Primers**

Paperback facsimile reprints of these three primers which use the Word Method to teaching reading, through the use of Bible stories.

### ♥ **Gospel Reader**

James Edson White (LMN Publishing, Hartland Publications, ABC)

Paperback facsimile reprint, tells the story of the great controversy from Creation to the New Earth.

### ♥ **Messiah, A Book for Today About a Man For All Time**

Jerry D. Thomas (ABC)

A contemporary adaptation of *The Desire of Ages*. Easy to read format with updated vocabulary on a seventh- to ninth-grade reading level. The beautiful, original message still shines through out this book.

### **Moore-McGuffey Readers**

(The Moore Academy)

The Moores selected the best stories from the early *McGuffey Readers* of 1836-1853 and added new full-color illustrations (in Books 1 & 2). There are four volumes, which retain the emphasis on character-building, family values, and morals. Each story is followed by a list of words which can be used as vocabulary and/or spelling words, and comprehension questions on the material read. They span a reading level from first grade to high school.

## SDA Readers: Life Series

(Contact the Review & Herald for a local distributor.)

This series replaces the older (1960's) Adventist versions of the "Dick and Jane" books that you may have used in church school. Levels 1 & 2 consist of a student work text and teacher's edition. Levels 3-15 consist of a student textbook, student activity set (two workbooks), and teacher's edition with answer keys, and test booklets. Available for grade K-9:

- ✚ *In the Beginning* (kindergarten)
- ✚ *A Time to Play* (grade 1, 1st quarter)
- ✚ *Seek and Find* (grade 1, 2nd quarter)
- ✚ *Who Will Come In?* (grade 1, 3rd quarter)
- ✚ *God Made It So* (grade 1, 4th quarter)
- ✚ *Wheels In a Wheel* (grade 2, first semester)
- ✚ *Love Your Neighbor* (grade 2, second semester)
- ✚ *Windows of Heaven* (grade 3, first semester)
- ✚ *Seedtime and Harvest* (grade 3, second semester)
- ✚ *A Time to Weave* (grade 4)
- ✚ *Miracles and Milestones* (grade 5)
- ✚ *On Eagles' Wings* (grade 6)
- ✚ *Of Morning Stars* (grade 7)
- ✚ *Who Is My Brother?* (grade 8)
- ✚ *Visions and Dreams* (grade 9)

The workbooks are okay but definitely optional. While they attempt to teach a lot of important study skills, much of it can be done using real-life situations: for example, dictionary and encyclopedia skills using the real books, not just a picture of an encyclopedia set in the workbook.

There is much more material given than one could possibly cover in one school year. It is designed so the teacher can be selective according to her students' needs. Some object to the use of historical fiction stories. On the other hand, there are many good denominational history and mission stories and nature documentaries throughout the books. These are hardback books and moderately expensive, but many times you can find used copies to buy.

*Reading Aloud: Read to your children from birth until they leave home! Always be reading a book together, the titles are endless.*

*Many children listen better when their hands are busy. Let them illustrate the story, color a picture of the same topic or build the scene with Legos. I still have the precious illustrations my children drew while we read *The Story of Redemption*.*

### ♥ **Stories of Little Ellen**

(Country Garden School)

Reprint of a lovely little book that we treasure. Reading level at about grade 1 or 2. Stories of Ellen Harmon as a child.

### **The Abaddon Conspiracy**

Raymond S. Moore (Bethany House Publishers, 1985). May be out of print; request information from The Moore Academy, Box 1, Camas, WA 98607.

A fascinating dramatization of Lucifer's rise and fall, revealing his covert schemes to corrupt God's design for the universe. Imaginary yet Biblically based account written in an interesting, readable, narrative style. Good for upper grade reading/literature assignments.

### ♥ **The Story of Jesus**

Ellen G. White (Country Garden School)

Adapted for children from *The Desire of Ages*, with accompanying Study Guide. Recommended for grade 3.

### ♥ **The Story of Redemption**

Ellen G. White (Country Garden School, ABC, Moore Foundation)

Covers from the fall of Lucifer to the New Earth and major Bible stories in between. Accompanying Study Guide, recommended grades 4 to 7.

Also available, the Easy English Edition which is easier for children to read and understand. We greatly enjoy reading it together for family worship.

*“In the colleges and universities thousands of youth devote a large part of the best years of life to the study of Greek and Latin. And while they are engaged in these studies, mind and character are molded by the evil sentiments of pagan literature, the reading of which is generally regarded as an essential part of the study of these languages.”*  
Ministry of Healing, page 443

### ♥ **True Education Reader series**

(Leaves of Autumn)

On July 20, 1899, Sister Ellen had a vision in which a heavenly messenger asked, “Why has not appropriate matter for reading books and other lesson books been selected and compiled?” (*Counsels to Teachers*, page 458) In response to this directive, in 1907 three Adventist educators began to release several volumes, which were “entirely free from myths, fairy tales, and all that tend to undermine

### **Teach Your Child to Read in 100 Easy Lessons**

(Timberdoodle, The Sycamore Tree) \$17.95.

Short, 20 minute, phonics based lessons, show you step-by-step how to teach your child to read. A pronunciation guide for those of us who were not taught phonics. One drawback is the silly stories given for practice reading, nothing objectionable, just nonsense.

I'd like to make one comment about **Harry Potter Books**. These books are sweeping the world and are being lauded as a great way to get children to read. They are also on the reading lists of many public schools.

I've heard the statement, "This is good magic." There is no such thing as good magic. God condemns magic, wizardry, sorcery, and divination and the penalty for participating in these things is death. For more information read: Deuteronomy 18:10-12, Leviticus 19:26, Jeremiah 14:14, Ezekiel 13:6, Isaiah 8:19, and do an Internet search.

*"As an educator no part of the Bible is of greater value than are its biographies. These biographies differ from all others in that they are absolutely true to life."*

*"No truth does the Bible more clearly teach than that what we do is the result of what we are. To a great degree the experiences of life are the fruition of our own thoughts and deeds."*

*Education, page 146*

## Science

**“In the beginning  
God created the  
heavens and the  
earth.”**

Genesis 1:1

Hands-on is certainly the best approach to learning in science. This type of science “curriculum” can begin from birth on. Science lends itself to learning projects. We have used the AY honors for an outline and expand our studies from there.

Be sure to read *Education, Science and the Bible*, pages 128-134 for more ideas on how science should be taught in relationship to the Bible.

Teaching science is easy. Use the Learning Project method for any topic your family is interested in. Or for a more methodical approach, get a good reference book such as *DK Science Encyclopedia* or *Science in the Creation Week* and begin by reading a topic. Do some corresponding experiments from *Backyard Scientist*, write a few sentences or a research paper (depending on child’s age), watch a video and research further on Internet or CD-ROM encyclopedia.

“For all the objects of His creation the condition is the same—a life sustained by receiving the life of God, a life exercised in harmony with the Creator’s will. To transgress His law, physical, mental, or moral, is to place one’s self out of harmony with the universe, to introduce discord, anarchy, ruin.

To him who learns thus to interpret its teachings, all nature becomes illuminated; the world is a lesson book, life a school. The unity of man with nature and with God, the universal dominion of law, the results of transgression, cannot fail of impressing the mind and molding the character.

These are lessons that our children need to learn. To the little child, not yet capable of learning from the printed page or of being introduced to the routine of the schoolroom, nature presents an unfailing source of instruction and delight. The heart not yet hardened by contact with evil is quick to recognize the Presence that pervades all created things. The ear as yet undulled by the world’s clamor is attentive to the Voice that speaks through nature’s utterances. And for those of older years, needing continually its silent reminders of the spiritual and eternal, nature’s teaching will be no less a source of pleasure and of instruction..

So far as possible, let the child from his earliest years be placed where this wonderful lesson book shall be open before him. Let him behold the glorious scenes painted by the great Master Artist upon the shifting canvas of the heavens, let him become acquainted with the wonders of earth and sea, let him watch the unfolding mysteries of the changing seasons, and, in all His works, learn of the Creator.

In no other way can the foundation of a true education be so firmly and surely laid.”

*Education, pages 99-101*

## Social Studies, History And Geography

There are many ways to study history, geography, and other social sciences, besides the traditional textbook method (read, discuss, review, and test, and then forget). Dr. Moore and other experts recommend reading biographies of important people. To Adventists, this surely should include biographies of the Adventist pioneers. I suggest that when you read biographies that you chart the individuals on a time line. By doing this, you can see what was happening in the world during that person's lifetime. Also use maps to look up geological places. Study the historical events, inventions and other things of interest as you read about them.

Field trips to historical places, government agencies, industries, and businesses can be very educational as well as enjoyable experiences, properly guided by the teaching parent. Social studies topics are easily integrated into learning projects that work well in this area. Use your imagination!

Read *Education, History and Prophecy* pages 173-184, and *Bible Biographies* pages 146-158 for information on teaching these subjects.

This is a great way to help our children, from babies on up, to be aware of our Great Commission to take the gospel to the whole world.

### ♥ Adventist History Curriculum

There is a real need for our Adventist denomination to write and publish history textbooks from an Adventist perspective, which would relate Bible prophecies and their fulfillment to historical events. Yet at the same time, I believe that we do have an Adventist History program. You will find this unique program in ***The Conflict of the Ages*** series.

- ✚ *The Story of Patriarchs and Prophets* covers Bible history by illustrating lives of Holy men found in the Bible.
- ✚ *The Story of Prophets and Kings* is about the captivity and restoration of Israel beginning with the reign of King Solomon to the birth of Jesus Christ.
- ✚ *The Desire of Ages* of course is the story of the life of Jesus
- ✚ *The Acts of the Apostles* covers the proclamation of the Gospel and God's purpose for His church.
- ✚ *The Great Controversy Between Christ and Satan* covers the destruction of Jerusalem to 1900's and includes Adventist prophetic history.

There is a wonderful resource to make the study of these books interesting. *Living By Principle* is the perfect high school Bible/History curriculum. This little book is a four-year daily plan to study the Conflict of the Ages and the Bible, cross-referencing in each.

There is also *My Covenant* published by Review & Herald Publishing. It is a one-year Bible reading guide with a five-year Spirit of Prophecy reading guide.

For the younger child there is a great set of books entitled *The Bible Pageant Series*. Written by Merlin Neff, published by Pacific Press in 1949, these are children's versions of the Conflict of the Ages. Titles are:

- ✚ *Brave Pioneers,*
- ✚ *Conquering Heroes,*
- ✚ *Kings and Queens,*
- ✚ *The Mighty Prince and Warriors of the Cross.*

These are available at a few ABC's, in church and school libraries, used Adventist book sources such as Lost and Found Books or Leaves of Autumn.

Teaching Tip:  
Hang up colorful laminated maps in your learning area or use desk size for the table or desk. When you read about a geographical place, locate on your maps. Use dry erase markers or grease pencils to mark the route traveled by the people you read about.

For middle children there is a new series of "Conflict of the Ages series for Kids!" Titles are:

- ✚ *Survivors of the Dark Rebellion,*
- ✚ *Exile of the Chosen,*
- ✚ *Victory of the Warrior King,*
- ✚ *Champions of the King,*
- ✚ *War of the Invisibles*

Also available at the ABC.

different individuals. Now back in print.

Great for your late or reluctant reader. In addition to the many Bible and character-building story audio cassettes, the Uncle Dan and Aunt Sue cast have produced these two sets:

*"The Bible is the most ancient and the most comprehensive history that men possess. It came fresh from the fountain of eternal truth, and throughout the ages a divine hand has preserved its purity. It lights up the far distant past, where human research in vain seeks to penetrate. In God's word only do we behold the power that laid the foundations of the earth and that stretched out the heavens. Here only do we find an authentic account of the origin of nations. Here only is given a history of our race unsullied by human pride of prejudice."*
