**Christ's
Method
Alone**

DISCLAIMER: The content provided in this newsletter is for your information only and is not intended as medical advice. It is to help you make better choices for the temple God has given you and present it as a living sacrifice to the creator.

Ministry of Healing

The thief cometh not, but for to steal, and to kill, and to destroy: I am come that they might have life, and that they might have [it] more abundantly. John 10:10

When the even was come, they brought unto him many that were possessed with devils: and he cast out the spirits with [his] word, and healed all that were sick:

That it might be fulfilled which was spoken by Esaias the prophet, saying, Himself took our infirmities, and bare [our] sicknesses. Mathew 8:16,17

Christ feels the woes of every sufferer. When evil spirits rend a human frame, Christ feels the curse. When fever is burning up the life current, He feels the agony. And He is just as willing to heal the sick now as when He was personally on earth. Christ's servants are His representatives, the channels for His working. He desires through them to exercise His healing power

In the Saviour's manner of healing there were lessons for His disciples. On one occasion He anointed the eyes of a blind man with clay, and bade him, "Go, wash in the pool of Siloam. . . . He went his way therefore, and washed, and came seeing." John 9:7. The cure could be wrought only by the power of the Great Healer, yet Christ made use of the simple agencies of nature. While He did not give countenance to drug medication, He sanctioned the use of simple and natural remedies.

To many of the afflicted ones who received healing, Christ said, "Sin no more, lest a worse thing come unto thee." John 5:14. Thus He taught that disease is the result of violating God's laws, both natural and spiritual. The great misery in the world would not exist did men but live in harmony with the Creator's plan.

Christ had been the guide and teacher of ancient Israel, and He taught them that health is the reward of obedience to the laws of God. The Great Physician who healed the sick in Palestine had spoken to His people from the pillar of cloud, telling them what they must do, and what God would do for them. "If thou wilt diligently hearken to the voice of the Lord thy God," He said, "and wilt do that which is right in His sight, and wilt give ear to His commandments, and keep all His statutes, I will put none of these diseases upon thee, which I have brought upon the Egyptians: for I am the Lord that healeth thee." Exodus 15:26. Christ gave to Israel definite instruction in regard to their habits of life, and He assured them, "The Lord will take away from thee all sickness." Deuteronomy 7:15. When they fulfilled the conditions, the promise was verified to them. "There was not one feeble person among their tribes." Psalm 105:37.

These lessons are for us. There are conditions to be observed by all who would preserve health. All should learn what these conditions are. The Lord is not pleased with ignorance in regard to His laws, either natural or spiritual. We are to be workers together with God for the restoration of health to the body as well as to the soul.

He causes the grass to grow for the cattle, and herb for the service of man: that he may bring forth food out of the earth;

Vibrant health –How the Body Works

And God said, Let us make man in our image, after our likeness: and let them have dominion over the fish of the sea, and over the fowl of the air, and over the cattle, and over all the earth, and over every creeping thing that creepeth upon the earth. And God said, Behold, I have given you every herb bearing seed, which [is] upon the face of all the earth, and every tree, in the which [is] the fruit of a tree yielding seed; to you it shall be for food: [Gen 1:29](#)

He causeth the grass to grow for the cattle, and herb for the service of man: that he may bring forth food out of the earth; And wine [that] maketh glad the heart of man, [and] oil to make [his] face to shine, and bread [which] strengtheneth man's heart. [Psalms04:14](#)

Food consumption is vital—most life forms on this planet need to consume some sort of “food” to exist and maintain expression, and most people will die if they stop eating. We eat for additional energy. We know that our cells are cities within themselves and are conscious entities; each cell knows its specific duties. cells need an external source of energy to sustain themselves in activity. Most people chew and swallow their food without thought of how or why it is utilized within the body. We assume that if it’s edible, it’s useable by the body. This just simply isn’t so.

The Four Basic Processes

Digestion is the first process that must take place in a healthy body and many people fail right here.

DIGESTION

First, when we consume any food it must go through a “digestive” process, or a process whereby the body breaks down the structures of the food into building materials and fuels. The body requires these raw materials for energy to function and also to build and repair itself.

The body breaks down the foods you eat into the following: Proteins are broken down into amino acids for building and repair material. Carbohydrates (starches and complex sugars) are broken down into simple sugars for fuel. Fats are broken down into fatty acids

and glycerol, for building, repair and emergency needs. Digestion is the first process that must take place in a healthy body and many people fail right here. If you are very thin or lack adequate muscle tissue, it is a strong probability that your body has not been digesting (breaking down) your foods adequately

ABSORPTION

Once foods are broken down, we must now absorb these building materials, fuels and other components, which include: tissue salts, vitamins, tannins, alkaloids, flavins, and the like. These components are now carried by the bloodstream to the cells for energy, stimulation, building and repairing, or stored for future use. Absorption is accomplished through the villi (fingerlike projections on the surface of certain membranes) and small pores all along the mucous membranes of the small and large intestines. This absorption should be simple, but most people’s intestines become impacted with a thick rubber-like substance called “mucoid plaque.” This thick plaque, which develops in the GI tract, is made of gluten, mucus, foreign protein, and other food by-products that act more like glue than nutrition! Refined sugars, grains, meats, and dairy products are the foods that are most responsible for the formation of this plaque. This “mucoid plaque” blocks the nutritional components of our foods from being adequately absorbed into the body. (I have seen patients who have eliminated buckets of this “black” plaque from their intestines.)

Most of us fail in the second stage of food utilization to some extent because of this congestive mucoid plaque. Again, if you are thin, malnourished or lack adequate muscle tissue, a malabsorption issue must be considered.

UTILIZATION

We must get nutrition to and into our cells. The blood system and its highways (the vascular system) are the transport

system. Most of the absorbed nutrition must first pass inspection by the liver, which can create further chemical changes, store nutrients, or pass them on unchanged to the rest of the body for utilization. The number of processes the liver can carry out is miraculous. It can create its own amino acids, change sugars to fats, and vice versa. It can create or destroy.

If our body (including our blood) becomes more acidic, our nutrition becomes anionic (coagulating). In other words, our building materials (fats, fuels, minerals, and other compounds) start sticking or clumping together. Most of the foods commonly eaten by humans are acid forming. Acidity, which is heat-producing, causes inflammation in the walls of the vascular highway and throughout the body.

Most of the foods commonly eaten by humans are acid forming. Acidity, which is heat-producing, causes inflammation in the walls of the vascular highway and throughout the body.

Lipids (fats) begin sticking to the walls of the vessels in hopes of buffering this inflammation. But lipid bonding also causes lipid stones, such as gallbladder and liver stones. Cholesterol is the most common anti-inflammatory lipid that the body uses to fight this inflammation. When the tissues become acidic and thus inflamed, the liver will produce more cholesterol to fight it. But that means that blood cholesterol levels begin to elevate. Minerals too start bonding and form “rock-type” stones, which show up as kidney stones, bone spurs, and the like. Cell membrane walls have tiny portholes that will not allow this “clumped” nutrition to be absorbed. When red blood cells start clumping together, blocking proper oxygen transport, or utilization, this creates cellular starvation, which causes hypo-active conditions of glands and organs, loss of systemic energy, loss of muscle tissue, and finally death. Many glands supply hormones, steroids, and the like, to assist utilization. As these glands become hypo- or underactive as described above, the utilization of calcium and other constituents is affected, creating many disease symptoms. For example, one of the jobs of calcium is to help transport nutrients across cell membrane walls. When the thyroid gland becomes hypoactive this slows or stops calcium utilization, which has a domino effect, causing cellular starvation. This, of course, makes tissue even weaker and the cycle just gets worse and worse until death. Most people fail in the utilization of their nutrition to some degree.

ELIMINATION

What goes in must, for the most part, come out. If it comes out looking the same way it went in, that’s a problem. (You should not see undigested foods, except corn, in your stools.) When the elements in food are broken down into their simplest forms for utilization by the cells, there are many by-products from this process—including gases, acids, cellular wastes, undigested proteins, and unused material like vitamins and minerals—that need to leave the body.

The body is always trying to eliminate in ways that we often do not understand. An example would be cold and flu-like symptoms, wheresneezing, coughing, sweating, aching, fevers, and diarrhea are experienced. These symptoms are elimination processes used by the body to purge itself of mucus, parasites, toxins, and the like.

Good elimination means moving our bowels three times a day, urinating adequately, sweating, and breathing properly. All of us fail in this category to some extent or another.

Healing the Vaccine Damaged (Part 1)

In Part 1, we will discuss the signs of vaccine damage and explore one stage of healing...

“Every vaccine recommended for use by government and doctors has been associated with hospitalizations, injuries and deaths. There is no guarantee that a particular vaccine will be safe to give to a particular individual and will not result in permanent injury or death.”

The National Vaccine Information Center

- ⇒ disabling fatigue;
- ⇒ loss of memory and mental skills;
- ⇒ paralysis of any part of body;
- ⇒ changes in sleep/wake pattern and dramatic personality changes;
- ⇒ lack of eye contact or social withdrawal
- ⇒ loss of ability to roll over, sit up or stand up
- ⇒ head banging or unusual flapping, rubbing, rocking, spinning;
- ⇒ onset of chronic ear or respiratory problems (including asthma);
- ⇒ severe/persistent diarrhea or chronic constipation;
- ⇒ excessive bruising, bleeding or anemia
- ⇒ other serious loss of physical, mental or emotional wellness

If you have recently got your child vaccinated and any symptoms from the list below occurs **in the hours, days or weeks following vaccination, the chances are that your child has suffered some type of vaccine damage (referred to as Vaccinosis)**

- ⇒ respiratory distress (difficulty breathing);
- ⇒ twitching or jerking of the body, arm, leg or head;
- ⇒ rolling or crossing of eyes;
- ⇒ severe head or neck pain;
- ⇒ joint pain or muscle weakness;
- ⇒ lack of eye contact or social withdrawal
- ⇒ loss of ability to roll over, sit up or stand up
- ⇒ head banging or unusual flapping, rubbing, rocking, spinning;
- ⇒ onset of chronic ear or respiratory problems (including asthma);
- ⇒ severe/persistent diarrhea or chronic constipation;

Understanding Your Newborn Child

At birth the infant has certain reflexes which are involuntary spontaneous movements or responses to certain actions. These reflexes which are automatic movements directed from the brain stem signify normal brain and nerve activity which include :

Root reflex which is stimulated when the infant's mouth opens when touched to assist the baby to feed.

The **Suck reflex** is triggered from the roof of the mouth when touched and occurs around 8 months and develops 4 weeks later.

The **Moro reflex** lasts for around 6 months and is witnessed when the baby is startled by a loud noise and it throws its head back and extends and contracts its arms and legs.

The **Tonic Neck reflex** lasts for 7 months and is seen when the baby turns its head to one side and the arm on that same side stretches out and on the opposite side the arms bends.

If you touch or stroke the baby's hand it will show its **Grasp reflex** which is approx 6 months in duration.

The **Babinski reflex** is displayed when the sole of the foot is stroked and the big toe bends back and other toes fan out.

There are other reflexes such as the **Spinal Galant** which occurs if the baby's Lumbar area is stimulated it will arch away.

Understanding What Has Happened

I am sure the burning question in every parent's thoughts are "Why has this happened to our child, there are millions of kids being vaccinated and they are ok". The answer is simple, tolerance and the bodies ability to eliminate the poisons as fast as possible. We as humans are unique and different so the factors governing tolerance and elimination vary amongst us all. One issue to appreciate is that vaccine trials involve 'healthy individuals', those that are not taking any prescription drugs and so forth. Once the trials are over and the regulatory agency approves the vaccines they are given to everybody healthy and the not so healthy without prior screening..how sick is that. Of course some children are going to take a hit but in the minds of the medical establishment they are expendable assets since we know the vaccines are not perfect and it's not our fault that the kid is not healthy. Well that's all well and good but to the parent of the vaccines injured child they have the anxiety and worry and tremendous effort to fix the problem which could take weeks, months or maybe years depending on the extent of the damage, not to mention the child that is going through this nightmare.

Vaccines have the Power to Interrupt Early Reflex Development

What is important to note here is that all these reflexes are primitive that normally should all disappear within 6-7 months, and replaced with postural reflexes to maintain posture, balance and fluidity of movement in an upright position. If this replacement does not occur these primitive reflexes become aberrant and then the child's ability to interact with its environment becomes delayed leading to possible inefficient motor coordination, sensory perception, cognition and expression. There are many reports of speech and motor coordination abnormality associated with vaccines because the ingredients themselves contain toxic substances that may interfere with these normal physiological processes resulting in specific developmental delays.

Damage Diagnosis

Apart from saving lives under pressure, and putting 'humpty dumpty' back together again when limbs are torn or broken, which conventional medicine are extremely proficient at, the only other memorable accomplishment is labeling symptoms. If they poison the body or as previously stated 'Cook' the immune system there is a plethora of conditions the body expresses: Aseptic meningitis, encephalitis, Multiple sclerosis, diabetes, Guillain Barre syndrome, Autism, ADHD, Fibromyalgia, Sudden Infant death (SID), Eczema, etc, etc and all these conditions can be triggered by Vaccines. It is irrelevant what condition it is, the individual has been damaged physiologically and psychologically and his or her body equilibrium has been compromised, so it is vital that this imbalance be corrected using naturopathic and chiropractic methods. Organic foodstuffs and complete lifestyle changes

Vaccine Damage Interferes with the Gut-Brain axis

The child's body is in a state of imbalance so it has to be corrected. The autonomic nervous system controls every sub conscious activity in the body and its probable that the toxicity has caused this imbalance so an adjustment from a chiropractor would be advisable to calm the body and to start bringing symmetry into the damaged body. The toxic load in the vaccines can cause gut disorders because the immune system is being 'cooked' such as viral gastroenteritis, irritable bowel and a whole host of neurological disorders as we explained above. This can also have an effect on our 6th sense or Proprioception that refers to the mechanism of sensing position and movement of limbs, muscle force and effort and balance, in other words our sense of self and awareness of our body and its movements.

To be continued next time

High Blood Pressure

Blood Pressure

This is the pressure exerted by blood upon the walls of the arteries, depending upon the force of the heart beat, the elasticity of the vessel walls, the resistance of the capillary network and the volume and viscosity of the blood.

Blood pressure shows the contractile powers of the heart and resistance of the blood vessels.

"The blood pressure increases every two years about one degree. The normal blood pressure is approximately 125 and at sixty it is 140.

Persons who are weak physically have a slightly lower pressure. Those who exercise have higher blood pressure" The old accepted routine of taking the blood pressure count has been 100 systolic plus the age, wherein a person of thirty years, it was felt, should have a normal blood pressure of 130, and a person of forty a blood pressure of 140, etc. But this is very erroneous, because at any age heavy meat eaters will have a higher blood pressure than vegetarians. There is actually no hard and fast rule on blood pressure. (Back to Eden , Jethro kloss, page 448)

Some of the Symptoms

Excessive pressure is exerted on the valves and the pumping muscles of the heart. A pressure is also exerted on the functioning lifelines in the body--the

arteries, the capillaries, etc. This condition is characterized by a red or flushed complexion, excess weight, discomfort, and sometimes skin pallor. High blood pressure is the result of improper living habits which cause a rundown condition in the body.

High Blood Pressure: With high blood pressure, cholesterol and mucus form a sludge within the body.

Avoid the mucus-forming foods and take herbs that act as a solvent by liquefying impurities such as cayenne, garlic or sassafras.

Take cayenne, working up to a teaspoon three times a day.

This increases the power of the heart and corrects the circulation problems. Garlic in copious amounts will

bring down high blood pressure.

Pure tomato juice is very good as a nutritional and a medicinal herb.

Wheat germ oil is excellent for feeding the heart and helps cut the cholesterol and smoothen its removal from the area.

Avoid the use of liquor and tobacco, caffeinated drinks, tea and coffee products.

Do not keep late hours, and avoid over-tiredness and worry.

Remove guiltiness in your life by trusting in the Lord, forgive one to another, separate yourself from anger, evil thoughts, bitterness, grudges.. Follow peace with all [men], and holiness, without which no man shall see the Lord:

Looking diligently lest any man fail of the grace of God; lest any root of bitterness springing up trouble [you], and thereby many be defiled" Hebrews 12:14,15 .

Sometimes we experience LBP or HBP because of Heart Infection, incase of heart infection...

Mix 8 ounces of Manuka honey,
10 ounces of blended garlic
Ginger 4 tbsp.
Cayenne 5 tsp
10 ounces of onion juice
Turmeric 4 tbsp
Black pepper 1 tsp
Mix all together and take one tbsp in tea 4 times daily

Take good bowel cleanser 3 times daily: 2tbsp senna, 1tbsp Bentonite clay, 1tbsp of activated charcoal, 2tsp of psyllium husks, add to 250mls of water, stir and drink immediately.

Eat 95 % raw diet

Drink water half your body weight in ounces

Food grade hydrogen peroxide 35%, mix 3 drops in one quart of water drink, each daily add one more drop until you reach 12 drops.

Example.

1. day mix one quart of water 3 drops of hydrogen peroxide drink doing the day.
 2. day mix 4 drops in one quart of water drink doing the day.
 3. day mix 5 drops in one quart of water drink doing the day
- Keep doing this until you reach 12 drops.

Another option would be

Mix 4 ounces of colloidal silver,
200 mg of vitamin B – 3,
Grape seed extract ½ ounce
Garlic 1 ounce,
Mix all together and drink one ounce for 2 weeks only.

Cookery

Food can be prepared simply and healthfully, but it requires skill to make it both palatable and nourishing. In order to learn how to cook, women should study and then patiently reduce what they learn to practice. People are suffering because they will not take the trouble to do this. I say to such, It is

time for you to rouse your dormant energies and inform yourselves. Do not think the time wasted which is devoted to obtaining a thorough knowledge and experience in the preparation of healthful, palatable food. No matter how long an experience you have had in cooking, if you still have the respon-

sibilities of a family, it is your duty to learn how to care for them properly. {Child guidance Pg 372}

From Remi's kitchen With love

Pumpkin Soup

Ingredients

- ☐ ½ cup peeled, Chopped pumkin
- ☐ 1 large peeled and Chopped Irish potato
- ☐ 2 cloves of Garlic minced
- ☐ 2 stalks of spring onion Chopped
- ☐ 1 teaspoon full
- ☐ Chopped cilantro stems
- ☐ 1 cup Plantbased milk
- ☐ ¼ cup water
- ☐ Salt to taste
- ☐ 1 teaspoon vegetables oil
- ☐ 1 green cayenne pepper or pinch of cayenne powder (optional?)

PROCEDURE

Place peeled pumpkin, potato onion, garlic,pepper, oil and water into a pot.

Boil rapidly for 15 minutes until pumpkin is very tender;

Use a stick blender or transfer to blender to blitz smooth.

Add salt and to taste, then add milk blend til milk is incorporated.

Return back to the cooking pot and cook on low heat for 5 minutes and serve while hot.

True medical missionary work is of divine origin, and has a most glorious mission to fulfil. In all its bearings it is to be in conformity with Christ's work.

At this stage of the medical missionary work nothing will help us more than to understand the mission of the greatest Medical Missionary that ever trod the earth; nothing will help us more than to realize how sacred is this line of service, and how perfectly it corresponds to the life-work of the Great Missionary. The object of our mission is the same as the object of Christ's mission. Why did God send his Son to the fallen world?--To make known to mankind his love for them. Christ came as a Redeemer. Throughout his ministry he kept The Saviour lived on this earth a life that love for God will constrain every true believer in Christ to live. Following his example, in our medical missionary work we shall reveal to the world that we are his representatives, and that our credentials are from above.

Christ knew that his Father had chosen him to carry out the great plan of redemption by coming to the fallen world to die for sinners. And when he came to fulfil his mission, he was, in every sense of the term, a medical missionary. We can do medical missionary work in a Christlike manner only when we are one with him. United with him, we receive spiritual life and power, and learn to be "laborers together with God," manifesting love for every one for whom he died, and working earnestly to bring into the heavenly garner a harvest of souls. Filled with his Spirit, men and women are animated with the same desire to save sinners that animated Christ in his lifework as a missionary sent of God.

I am instructed to say that God desires to have the medical missionary work cleansed from the tarnish of earthliness, and elevated to its true position before the world. Our medical missionary workers must rise to heights that can be reached only by a living, working faith. At this time in our history, we are to allow no confusion of sentiment to prevail in regard to what should be expected of medical missionaries sent of God. There should be a more clear, definite understanding of what medical missionary work comprehends. Those who desire to honor God will not mingle worldly policy plans with his plans in attempting to accomplish that which this work is ordained by him to accomplish.

Clothed with humanity, Christ performed a work that revealed the invisible Father, in order that his disciples might understand the meaning of the prayer, "Thy kingdom come. Thy will be done in earth, as it is in heaven." But how many who claim to be his followers concede to a worldly policy! This is because their hearts are not filled with love for the truth. God's purpose in committing to men and women the mission that he committed to Christ, is to separate his followers from worldly policy. The people of God, those who claim to love him and to keep his commandments, are to reflect a much clearer, purer light than they now reflect. Even Christ desired men to know that he was not acting independently, but in behalf of another, who had sent him. He never for a moment lost sight of the greatness of his mission. He was always conscious of the fact that he was the Sent of God. And to his Father he declares concerning his disciples, "As thou hast sent me into the world, even so have I also sent them into the world."

Our work is clearly defined. As the Father sent his only begotten Son into our world, even so Christ sends us, his disciples, as his medical missionary workers. In fulfilling this high and holy mission, we are to do the will of God. No one man's ideas or judgment are to be our criterion as to what constitutes genuine medical missionary work. We can have power and efficiency only by working as Christ worked. And we can be Christlike in word and deed only when his will is perfected in us. Then shall his righteousness go before us, and the glory of the Lord shall be our rearward.

The life of Christ must become our life, our light, our exceeding great reward. Our words and works must bear a living testimony that in our lives we are not lying against the truth we claim to believe. If Christ is indeed formed within, the hope of glory, we shall manifest that tenderness, that love, that fervency of spirit, which reveals his character. Our hearts will be humble, our spirits contrite. Our works will bear witness to his indwelling presence. His disposition, his kindness, his compassion, manifested in us, will inspire hope in the hearts of the most hopeless. Thus in act, as well as in word, we shall reveal to the world the character of the Unseen.

Garden Missionary work

While we were in Australia, we adopted the . . . plan . . . of (1)**digging deep trenches** and filling them in with (2)**dressing that would create good soil**. This we did in the cultivation of tomatoes, oranges, lemons, peaches, and grapes.

The man of whom we purchased our peach trees told me that he would be pleased to have me observe the way they were planted. **I then asked him to let me show him how it had been represented in the night season that they should be planted.** I ordered my hired man to (1)**dig a deep cavity in the ground**, then (2)**put in rich dirt**, (3)**then stones**, (4)**then rich dirt**. (5)**After this he put in layers of earth and dressing until the hole was filled.** I told the nurseryman that I had planted in this way in the rocky soil in America. I invited him to visit me when these fruits should be ripe. He said to me, "You need no lesson from me to teach you how to plant the trees."

Our crops were very successful. **The peaches were the most beautiful in coloring, and the most delicious in flavor of any that I had tasted.** We grew the large yellow Crawford and other varieties, grapes, apricots, nectarines, and plums.--Letter 350, 1907.

Trying out the method in our Laikipia Sanitarium and mission Centre

Step 1: Digging of a deep hole 3fts deep by 3fts wide

Step 2 & 3: Placing of rich dirt about 10cm from below followed by a layer of dolomite stones to help in balancing the electrostatics in the roots and also preservation of

Step 4: Planting on the Rock

Step 5: Place a mixture of rich compost on the sides of the plant or plant directly on the rich dirt. You can also chose to mix the top soil with compost.

This apple plant when well cared for can begin producing sweet and colorful fruits from June. See you then.

Testimonials

Recently we have been on the search for most herbs that we can use in treating patients. One of the most sought for has been POKE WEED or Poke sallet . We thank God we have managed to get the seeds and we shall begin farming it. Its amazing uses include:

Blood purifier. You can make a powerful blood cleanser for any degenerative disease with equal parts of licorice root, tylossema , mango bark, albizzia bark, buddock root and poke root. This will break out the tumor mass and dislodge it through the liver, then through the elimination channels.

Very effective of HIV/Aids cases. It activates the immune cells hence help in enhancing the work of the T and B-cells.

It is a dependable herb to treat breast swelling, from which so many women suffer following childbirth, making nursing impossible. Dr. Kloss described this use. He said to grind fine the fresh root and roll this out into a poultice to cover the breast completely, cutting out a hole for the nipple. Using a piece of cheesecloth or other thin (cotton) material to cover the breast, apply and once daily moisten the poultice with Poke root tea made fresh each time. Do this for three days, each time putting on a fresh poultice. You can continue the treatment for fifteen days which should pull little sores filled with pus. In some weeks, he said, the hardness should leave the breast although we consider that it works much faster in many cases . This same treatment has worked wonders in cases of breast cancer.

Concluding remarks

•No line is to be drawn between the genuine medical missionary work and the gospel ministry. These two must blend. They are not to stand apart as separate lines of work. **They are to be joined in an inseparable union, even as the hand is joined to the body.** Those in our institutions are to give evidence that they understand their part in the genuine gospel medical missionary work. A solemn dignity is to characterize genuine medical missionaries. They are to be men who understand and know God and the power of His grace.--Letter 102, 1900.

•Successful evangelistic work can be done in connection with medical missionary work. It is as these lines of work are united that we may expect to gather the most precious fruit for the Lord. --Medical Ministry, p. 26.
